

We support the charter of Charter of the Minimum Demands of Iran's Independent Trade Unions and Civic Organisations.

We, a group of political, labor, social, women's rights, and cultural activists abroad, support the "Charter of the Minimum Demands of Iran's Independent Trade Unions and Civic Organisations", send our sincere greetings to our friends in these organizations, and announce our solidarity with them.

This Charter is a compact and solid expression of the wishes, demands and orders that the people of Iran have fought for against the authoritarian royal and religious ruling governments for more than a hundred years.

And now, while all kinds of right-wing opposition movements, including monarchists and other advocates of top-down changes, are trying to once again shape political power from the top and impose it on the people by restraining and deviating the their revolution, the charter recognizes the realization of the 12 minimum demands contained in it "as the first orders and the result of the fundamental protests of the Iranian people, and the only way to build a new, modern and humane society" in the country by emphasizing on the role of large social movements and the right of the people to shape the political power.

The Charter of the " Minimum Demands of Iran's Independent Trade Unions and Civic Organisations" is the decree to overthrow the Islamic regime by the revolutionary people, and is the charter of workers, women, students, youths, litigants, and all those who are committed to equality and freedom.

May the flag of the demands contained in the charter be raised on the "highest height of freedom".
